Closeout Report Requirements

3 - Inventory of Changes

4 - Resolution of Comments (Internal Use Only)

1. <u>Background</u>. The standard Assurances in the AIP application for Federal Assistance and Standard Conditions of the grant agreement incorporate the provisions of 49 CFR Part 18 and OMB Circular A-128. On March 11, 1988 the OMB

Distribution: AGL-600/601/602/603/605/ Originator: AGL-610

610/620 ADO-CHI/ADO-DET/ ADO-MSP/ADO-BIS State Aviation Directors (for information through ADO's) published a revision to OMB Circular A-102, Grants and Cooperative Agreements with State and Local Governments, that called for each agency to issue its own regulations from a common rule designated by OMB. The Department of Transportation, on the same date published 49 CFR Part 18 to establish consistency and uniformity in the administration of grants and cooperative agreements to State and local governments. As stated in the background paragraph of the now cancelled PPM 5100.8A: "Attachment G of A-102 set forth the standards for grantee financial managements systems and the requirements for sponsor audit capability. Attachment P of A-102 established the standard for state and local government-arranged independent audits. The basic philosophy of Attachment P is that audits be made on an organization-wide, time-frame basis, rather than on a grantby-grant basis. A-128 supercedes Attachment P, and builds on the organization-wide, system audit concept."

2. Policy/Procedures.

- a. Grants prior to September 18, 1985. Sponsor should have an Attachment P system audit, but may utilize a project-specific audit.
- (1) A system audit, once approved by the Cognizant Agency, shall be the basis for closing out grants. The ADO shall reference the date of the last-approved system audit and approve actual allowable costs in the project close-out report (PCR). New and updated system audits will be reviewed by the Cognizant Agency.
- (2) Lacking a system audit, a project-specific audit will be utilized in preparing the FPR. OIG review will not be requested by the ADO. ADAP grants meeting the criteria for Order 5100.36, paragraph 1343.a.(1) through (4), may be closed by the ADO without audit.
- b. Grants subsequent to September 18, 1985. Sponsor must have an audit in accordance with OMB Circular A-128. All A-128 audits will be reviewed by the Cognizant Federal Agency (See Appendix 1). (An established ongoing system audit, started under Attachment P, not yet converted to A-128, is also acceptable.)
- (1) A-128 audits, once approved by the Cognizant Agency, shall be the basis for closing out grants. The ADO shall reference the date of the last-approved A-128 audit in the final recommendation of actual allowable costs in the PCR.

(2) Reserved.

- Project Close-Out Procedures. In accordance with the foregoing, all grants must be covered by an Attachment P Audit, an A-128 Audit, or a Project-Specific Audit, depending on the date of the grant. (An exception is an ADAP grant being closed without audit.) Specific close-out procedures for various types of grants and situations are listed below. Generally, for grants dated prior to September 18, 1985, where the sponsor has not obtained an Attachment P or Project-Specific Audit, unilateral closure will be effected based on the ADO's knowledge of the cost of eligible work accomplished, with a very conservative accounting. Generally, this will mean that costs not associated with contracts, or otherwise documented such as administrative, some legal, overhead changes, etc., will not have Federal participation. Grants dated subsequent to September 18, 1985, shall be unilaterally closed in the same fashion.
- (1) For Non-land Projects If all the development has been completed for at least 6 months and the project is not closed, the ADO will issue a letter to the sponsor indicating that unilateral closeout will be initiated in 60 days. The ADO's letter shall contain the ADO's recap of the project costs based on partial payments or letter of credit drawdowns made up to that date. Unless the sponsor provides substantial justification within the 60 days as to why closeout should not proceed, such action shall be taken.

(2) For Projects That Include Land

- (a) All land has been acquired If all the development, including land acquisition, has been completed for at least 6 months and the project is still not closed, the ADO shall issue a letter to the sponsor indicating that certification as to property title or whatever other outstanding documentation is lacking for conventional closeout will be accepted if received within 30 days. If not received within 30 days, or adequate justification for keeping the project open is not received, the project will be unilaterally closed. The land will stay in the grant description but there will be no payment to the sponsor for the land in question.
- (b) All land not acquired, costs not incurred If there has been no sponsor activity toward acquiring the remaining land for 6 months, the land should be deleted, the grant reduced, and financially closed. If the land is required for safety reasons, the only future grant that can

FEB 2 & 1993

22M 5100.8B

be considered is one to acquire the necessary property interests in land so deleted. The scope change and grant amount reduction shall be accomplished by unilateral grant amendment, supported by ADO backup and justification.

(c) All land not acquired, some costs incurred - Incurred costs can consist of an offer to purchase, filing of condemnation, or any case where the sponsor is obligated to purchase the land, if the seller accepts the offer or the condemnation action cannot be withdrawn or cancelled. In the case of grants dated prior to May 28, 1980, land and costs may be deleted and reprogrammed. In the case of grants dated after May 28, 1980, land costs may be deleted, but the land will remain in the grant description and the land cannot be reprogrammed.

(3) Reserved.

- (4) Planning and Part 150 Study Grants. Each ADO shall review the status of all open system/master planning and Part 150 study grants every 6 months to see if they are 90 or more days behind schedule. If so, the ADO and the grantee should agree on a revised schedule for completion. Continual slippage of schedules can be the basis for unilateral closure in an amount equal to the eligible work actually completed and submitted. Similarly, "continuous" or follow-up (phased) planning grants shall be withheld if the previous grant has fallen more than 6 months behind schedule. "First time" master planning grants may be closed without a system audit.
- d. <u>Indirect Costs</u>. Indirect costs are allowable only if the Sponsor has an approved cost allocation plan prepared in accordance with OMB Circular A-87. Approved indirect cost rates for a sponsor shall remain in effect until the Sponsor submits a revised cost allocation, or until the FAA has reason to believe that the rate may have substantially changed.
- e. Audits of Force Account Work and Cost-Plus-Fixed-Fee-Contracts. Generally, an audit of force account costs should not be recessary, since the system audit should cover these. In the case of a state system audit, the local Sponsor should have to submit acceptable (to the state auditors) cost documentation supporting force account work.
- (1) In the case of cost plus fixed fee contracts, a number of subjective evaluations are necessary. We do not want to spend \$2,000 for an audit that may turn up \$500 in recoveries or disallowances. The dollar amount of the

contract is a consideration. (FHWA currently (1985) used \$50,000 as a cut-off; contracts under that amount are not audited separately.) The recency of a previous audit and experience with the contractor are also considerations.

- (2) If an ADO decides that a specific audit of a cost plus fixed fee contractor is needed, the cost of the audit will be an allowable project cost.
- f. Financial Management System Reviews for Grants
 Prior to September 18, 1985.
- (1) A pre-requisite to making advance payments is an acceptable financial management system, in accordance with A-102, Attachments J and G. With the inception of Attachment P requirements, and continuing with A-128 requirements, the OIG ceased performing Sponsor's Attachment G Audits. If a Sponsor desires advance payments, it would have to obtain an Attachment G Audit, without Federal participation, and submit it to the FAA (ADO). The ADO will review and accept it or not. The OIG has no involvement with Attachment G Audits, including the review process.
- (2) As an option, and depending on our knowledge of a Sponsor's financial management system, it would also be an FAA (ADO) decision to accept the Sponsor's financial management system as a part of an approved Attachment P or A-128 Audit.
- (3) Sponsors will be expected to perform their own routine system reviews according to the standards contained in the compliance supplement for single audits of state and local governments. The Sponsor's obligation to accomplish these system reviews is contained in Attachment G to OMB Circular A-102. In special circumstances, the OIG will perform system reviews when requested by the ADO.

q. Division Procedures.

- (1) In the case of pre-September 18, 1985, grants, where a project-specific audit has been performed, the ADO will incorporate the findings of the audit in the project close-out report (PCR).
- (2) In the case of grants with sponsors utilizing a periodic system audit, the PCR shall reference the last approved system audit and conclude with final allowable costs.
- (3) In the case of ADAP grants being closed without audit, per 2.a.(2) above, no review will be done. The ADO

audit, per 2.a.(2) above, no review will be done. The ADO shall obtain sufficient backup cost data from the sponsor to allow determination of the amount of final eligible and allowable costs to be set forth in the PCR.

- h. <u>Project Close-out Report (PCR)</u>. The PCR will take on greater importance with the elimination of Regional Grant Review's (RGR's). ADO action on final payments and financial closures will be based on the PCR. In order to standardize the information and format of the PCR, the following guidance shall be followed:
- (1) The report should be in narrative form, and include as a minimum a project summary, including the airport development or study scope, any unusual factors or conditions to be considered before final payment, use of force account, and the maximum grant amount.
- (2) A statement whether all work included on approved project plans and included in the grant's project description has been satisfactorily completed; and whether or not all construction or planning work was performed in full conformity with approved project plans and specifications, Sponsor's certification should be referenced.
- (3) A statement whether the Sponsor has claimed costs for any work not within the scope of the project.
- (4) A statement that the Sponsor has complied with the terms and conditions of the grant agreement, including all special conditions; Sponsor's certification should be referenced.
- (5) A presentation of total eligible and allowable costs, broken down by costs claimed and recommended. The amount suspended or disallowed shall be set forth together with the reasons for disallowance. Any unusual factors or circumstances relating to the project should be discussed in the report and conclusions or decisions relating thereto should be stated. The cost information should be presented in the format shown in Appendix 2.
- (6) After January 1, 1993, the format for PCR submitted by the sponsor to the ADO should conform to Appendix 2. Preparation of the PCR is an eligible project cost, and it is an internal ADO document. After the ADO determines the sponsor's PCR acceptable, the ADO has the option of submitting the PCR in its entirety or only the following pages to AGL-610 for final processing:

- Project Summary
- Executive Summary
- Project Cost Summary
- Adjustment Notes.

i. Phase 8 Issuances.

- (1) In cases where no further payment is due, AGL-610 will issue a Phase 8, dated the same date the ADO approves the PCR.
- (2) If the grant amount requires adjustment, based on the PCR, AGL-610 will issue a Phase 8 dated as of the Accounting certification date on the 1413.
- (3) If a final payment is due AGL-610 will issue a Phase 8, dated as of the payment.

OFFICE OF MANAGEMENT AND BUDGET

Federal Agencies Responsible for Cost Negotiation and Audit of State and Local Governments; Republication

[Editorial Note: The following document was originally published at page 52406 in the issue of Monday. December 23, 1985. In that publication, the list of cognizant agency assignments for the State of Missouri was omitted and the asterisks in the list were not printed correctly. The corrected document is reprinted below in its entirety.]

AGENCY: Office of Management and Budget, Financial Management Division.
ACTION: Final notice.

SUMMARY: This notice transmits a revised list of Federal agencies responsible for administering the provisions of OMB Circular A-87, "Cost Principles for State and Local Governments," and OMB Circular A-128, "Audits of State and Local Governments."

FOR FURTHER INFORMATION CONTACT: Marvin E. Saunders, Financial Management Division, (202) 395–3993.

John J. Lordan,

Deputy Associate Director for Financial Management.

SUPPLEMENTARY INFORMATION:

Office of Management and Budget

Federal Agencies Responsible for Cost Negotiation and Audit of State and Local Governments

Agency: Office of Management and Budget.

Action: Notice of Comizant Agency
Assignments.

Summary: This notice transmits a revised list of Federal agencies responsible for administering the provisions of OMB Circular A-87, "Cost Principles for State and Local Governments," and OMB Circular A-128, "Audits of State and Local Governments."

In the past OMB has assigned cognizance separately for cost allocation and for audit. The revised list combines the assignments and makes one Federal agency responsible for both requirements. Federal agencies assigned cognizance under this notice shall remain cognizant for a period of three years.

The revised list replaces cognizant agency assignments published in the Federal Register on February 28, 1980, and October 6, 1980. The revised list also replaces audit assignments for local governments included in the Director of OMB's Memorandum to Departments and Agencies dated March 2, 1982.

For Further Information Contact: Marvin E. Saunders, Financial Management Division, Office of Management and Budget, Washington, DC 20503, (202) 395–3993.

Supplemental Information: On February 27, 1985, OMB requested comments from the major grantmaking agencies on a proposed revision to the cognizant agency assignments.

Comments received from the agencies were analyzed and considered in developing the revised list included in this notice.

The revised list assigns cognizance under Circulars A-87 and A-128 for most governmental units included in the 1980 and 1982 lists. Where organizational changes have occurred at the State and local levels, appropriate cognizant agency assignments have been made for the new government entities. Cognizant agency assignments have been made for all States, including State agencies. Territorial governments, Indian tribal governments, and larger local governments are also included. Those State departments and local units of government not listed should deal with the Federal agency providing them the most funds.

Generally, the new assignments make the same Federal agency responsible for cost negotiation and for audit. The only exception is for statewide cognizance. Under Circular A-87, the Department of Health and Human Services has negotiated statewide cost allocation plans for all States, plus the District of Columbia and Puerto Rico. OMB sees no reason for change. Consequently, in many cases the Federal agencies assigned statewide responsibility for cost negotiation and the lead agency 1 for audit will be different.

The following Federal agencies will continue to be responsible for audit and approval of cost allocation plans and general oversight of single audits.

Indian tribal governments	DOI
Territorial governments	DOI
Special districts:	
Airport authorities	DOT
Economic development districts	DOC
Hospital, library, and health dis-	HHS
tricts.	

Lead agencies for audit are designated in the list by an asterisk. For local governments the asterisk also indicates the Federal agency responsible for negotiating cost allocation plans. Federal agencies assigned as lead agencies should represent the interest of other Federal audit agencies in carrying out the cognizant agency responsibilities for single audit of State and local governments. Federal agencies assigned audit cognizance for State and local departmental units shall cooperate with and assist the lead agency in carrying out the requirement for the single audit.

Housing and urban development districts.	HUD
Park and recreation districts	
School districts	ED
Transit districts	DOT
Water and sewer districts	EPA

Because of frequent changes in Federal agency funding levels of State and local recipients requiring changes in cognizant assignments, several agencies have suggested that the term of the cognizance assignments be fixed. OMB agrees that this would be usefu and has established the period of assignments at three years. During that time cognizant agencies requiring help in accomplishing its assignments may request assistance from other agencies. However, the assigned cognizant agency shall continue to be responsible under this directive. After three years the Federal agency or the recipient may request OMB to consider a change in the cognizant assignment if circumstances warrant.

James C. Miller III.

Part III

Quality Project Closeout Report Requirements

PREFACE:

The quality project formulation, management and completion process begins and ends with timely communications and a commitment to provide an improvement to aviation safety and development on schedule.

PURPOSE:

The Project Closeout Report certifies and summarizes to the FAA the history of the project, eligible costs incurred, project testing and inspection, specification adherence and corrective action taken on any deficiencies. It is submitted, along with any other supporting documentation, to the appropriate FAA field office (refer to Appendix 1). The preparation of the final closeout report is the responsibility of the Sponsor.

COMMITMENTS:

Sponsor Commitments:

The Sponsor should be committed to provision of the Project Closeout Report to the FAA within 90 days of physical completion of the project. The report should be in the format contained in this guide (refer to Appendix 3).

Consultant Commitments:

The project consultants should finalize project records and prepare for the Sponsor the Final Project Closeout Report documentation within 10 days of physical completion of the project.

FAA Commitments:

The FAA should be committed to process final payment applications within 30 days of receipt of the Project Closeout Report. Some final payment applications will necessarily take longer if additional funds are required.

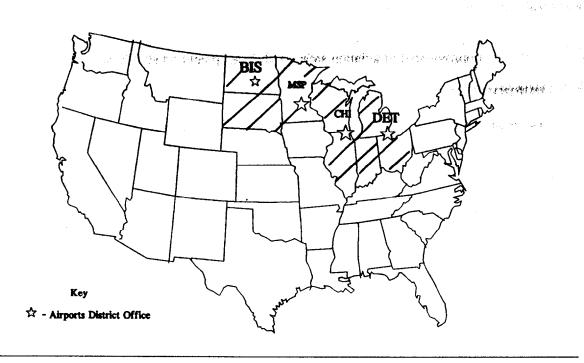

SUMMARY:

Closing out a project is a responsibility that involves the commitment of the Sponsor (and Sponsor's consultant), often the State Aeronautics Bureau and FAA project manager. Quality communications and project record keeping at the beginning of the project are essential to make closing out of a project more of a summary task rather than a data collection task. The ultimate goal is not simply closing out projects, but to promote quality project formulation and management processes that result in projects being completed on schedule. The FAA requirements for the preparation of a Quality Project Closeout Report are contained in Appendix 2 of this Sponsor Guide.

Part III

Quality Project Closeout Report Requirements

Appendix 2 - Quality Project Closeout Report Requirements

The Final Project Closeout Report should be divided into the following sections:

- A. Project Summary
- B. Executive Summary
- C. Project Cost Summary
 - 1. Administrative
 - 2. Land
 - 3. Consultant
 - 4. Testing
 - 5. Inspection
 - 6. Construction
 - 7. Equipment
 - 8. OTHER

C(2) Land Acquisition Summary

- D. Partial Payment History Summary
- E. Change Order Summary
- F. Mandatory Project Review Comments and Certification Summary
- G. DBE Participation Summary
- H. Final Inspection Report and Punch List Item Clearance
- I. Construction Management Report
- J. Conclusion: Final Payment Recommendations and Project Amendment Requirements

A brief description of what is required under each of the above Project Closeout Report Sections follows:

- A. Project Summary This is a presentation of specific information on the AIP project description, amount and amendment history.
- B. Executive Summary This section highlights any unusual factors associated with the project management and accomplishment and specific recommendations for project closeout. For example:
 - (1) Liquidated damages
 - (2) Unsatisfactory construction
 - (3) Unusual delays in project accomplishment
 - (4) Non-performed items
 - (5) Ineligible work

Part III

Quality Project Closeout Report Requirements

Appendix 2 - Quality Project Closeout Report Requirements (con't)

- C. Project Cost Summary This section is the substance of the closeout report and details eligible and reasonable costs incurred for all major project cost categories. It is presented in the format suggested in this Sponsor Guide. Sponsors should refer to AC 150/5100-10A Accounting Records Guide for Airport Aid Program Sponsors. This advisory circular sets forth record keeping requirements imposed on Sponsors receiving federal aid for airport improvements. Each specific cost category needs a detailed summary as follows:
 - 1. Administrative Costs Itemization of specific administrative costs incurred for audit service, advertisement, legal, closeout, project management, etc.
 - Land Costs A complete listing of all parcels included in project with itemization
 of costs incurred for acquisition and relocation along with appraisal information,
 negotiated and/or condemnation awards and determination of reasonableness. A
 format for land cost summary is found on Page 9.
 - 3. Consultant Costs A complete listing of all consultant contract services for both preliminary and final design, indicating original contract amounts and any increases. Increased contract amounts should indicate date, amount, work performed and justification.
 - 4. <u>Testing Costs</u> All testing lab contracts services should be listed by company and identify original contract amounts and justification for any increases, etc.
 - 5. <u>Inspection Services</u> A complete listing of all inspection service costs by contract or force account.
 - 6. Construction Contract A listing of each individual contract with original bid amount and all change orders with amounts and justification as indicated in Appendix 3 "Project Closeout Report" format.
 - 7. Equipment Contracts Same as above for construction contract.
 - 8. Other Service Any project costs incurred not fitting any of the above categories should be identified.
- D. thru J. Requirements are self-explanatory as indicated on each section page.

APPENDIX 3

INVENTORY OF CHANGES, PPM 5100.8B AUDITS & PROJECT CLOSEOUTS

- 1. Acknowledges updated organization; i.e. AGL-610 and -620.
- 2. Deletes requirement for "final payment request package" and submittal of same to the regional office. This "package" becomes the "final Project Close-Out Report" and is an internal ADO document (and necessarily included in Sponsor's "final closeout report").
- 3. Deletes requirement to withdraw (\$2500 or 1/2 of one percent of the grant amount pending A-128 audit).
- 4. Deletes policy allowing Sponsors to reclaim disallowed land costs after financial closeout.
- 5. Deletes reference to PGP.
- 6. Deletes condition on closeout of master planning grants without a system audit "if a subsequent development grant is not imminent."
- 7. Deletes requirement to submit Attachment G audits to regional office for decision.
- 8. ADO's in special circumstances (and this would be <u>very</u> rare) may request system reviews. This is not a -610 (660) action.
- 9. Deletes requirement for "regional grant review".
- 10. Clarifies that "final payment actions" are ADO actions. AGL-610 is involved from a funding availability standpoint and Phase 8 issuance only.
- 11. Provides final Project Close-Out Report format which "SHOULD" be used (in lieu of "SHALL" be used). Format is properly an ADO decision.
- 12. Provides that Phase 8 action shall be accomplished by AGL-610.
- 13. Intends to utilize the <u>Sponsor's</u> final closeout report to the maximum possible extent. This is an eligible cost.

14. Appendix 2 is now "The Sponsor's Guide to Quality Project Closeout Report Requirements". This was previously mailed, in quantity, to the ADO's to assist the sponsor in accomplishing project closeouts. It is in such a format that it can be copied directly from this PPM and mailed to a sponsor closing a project.
